PROFESSIONAL SUMMARY

Motivated CS undergraduate skilled in full-stack web development using Python, Django, React, and REST APIs. Strong DSA foundation with 350+ problems solved on LeetCode and GFG. Experienced building and deploying production-ready applications. Seeking an entry-level software development role to deliver scalable, impactful solutions.

TECHNICAL SKILLS

Languages: C++, Python

Frontend: HTML5, CSS3, JavaScript

Backend: Django, Django REST Framework, Flask, REST APIs, Jinja2 Templates, Session Management

Databases: MySQL, MongoDB, SQLite

DevOps & Tools: Git, GitHub, VS Code, Postman

Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks, Cloud Computing

PROJECTS

The Expense Tracker

GitHub

Stack: HTML, CSS, JavaScript, Flask, Python, Bootstrap, Jinja2, Render

- Developed an intuitive expense management application enabling users to track, categorize, and analyze daily expenses with a clean, user-friendly interface.
- Implemented secure session-based user authentication (login, signup, logout) using Flask, protecting user data and preventing unauthorized access to personal records.
- Designed a fully responsive UI with Bootstrap ensuring seamless usability across desktops, tablets, and mobile devices for on-the-go expense tracking.
- Deployed the application on Render cloud platform, ensuring public accessibility with continuous availability and zero-downtime for end users.

E-Commerce Web Application

GitHub

Stack: Django, Python, HTML, CSS, JavaScript, SQLite, Bootstrap

- Developed a fully functional e-commerce platform supporting product listing, shopping cart, and order placement, delivering end-to-end purchase workflows for users.
- Implemented secure user authentication and authorization using Django's built-in auth system, managing sessions, form validation, and role-based access control.
- Leveraged Django ORM for all database interactions with SQLite, enabling efficient querying, filtering, and relational data management across product and order models.
- Administered product catalogues and order records via Django Admin panel, streamlining inventory oversight and reducing manual operational overhead.

College ERP System

GitHub

Stack: Django, Django REST Framework, React (Vite), PostgreSQL, Tailwind CSS

- Developed a full-stack College ERP system to manage student records, faculty data, attendance, and academic workflows.
- Built RESTful APIs using Django REST Framework for efficient data handling and seamless frontend-backend integration.
- Implemented role-based access control (RBAC) for Admin, Faculty, and Students to ensure secure and structured access.
- Designed a normalized PostgreSQL schema with optimized queries to handle large-scale academic data across multiple modules efficiently.

EDUCATION

Bachelor of Technology – Computer Science & Engineering

2022 – 2026

Raj Kumar Goel Institute of Technology (RKGIT), AKTU CGPA: **8.2 / 10** (Current)

Relevant Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, Cloud Computing

CERTIFICATIONS & ACHIEVEMENTS

- **Programming in Python** – Coursera | **The Joy of Computing Using Python** –NPTEL
- Solved **350+ DSA problems** on LeetCode and GeeksforGeeks covering arrays, trees, graphs, and dynamic programming.
- Strong problem-solving, critical thinking, and adaptability skills with a proven ability to quickly learn new technologies.
